ETL-11	ETL-11R	1350-2700	1000-2000	1"	1450	1530	23.5	

We also offer Torque Wrenches of following types:

Open Jaw Fixed Head Type

These types of Torque Wrenches are available in standard Across Flat sizes from 10 mm to 46 mm with torque preset to one value as per bolt torque capacity or customer requirement. These torque wrenches can be used directly on bolt, there is no need of sockets.

Ring Type

These types of Torque Wrenches are available in standard Across Flat sizes from 10 mm to 46 mm with torque preset to one value as per bolt torque capacity or customer requirement. These torque wrenches can be used directly on bolt, there is no need of sockets.

Preset Torque Production Type

These types of Torques Wrenches are designed specifically for use on production lines where many fasteners are to be tightened to the same torques value. It improves working efficiency of workmen and the production works will complete.
